

November 9, 2011

CenturyLink does have a diverse route in place in this location today. One route is full and will require a fiber overbuild which is scheduled for next year. Once this is done facilities would be in place to provide a diverse route. Of course depending on where the building is located will determine the amount of new fiber and associated cost that will need to be placed.

If you have any questions or need more information please do not hesitate to contact me.

Sincerely,

Larry R. Liles  
Area Operations Manager
